

AFSI CKIT-003, Fiber Optic Consumables Kit

About the CKIT-003

The CKIT003 is designed to do approximately 200 epoxy style termini or connectors. This kit will restock all of the AFSI US Army and USMC FKIT tool kit series products. It comes in a convenient carry case that allows the technician to take this directly to the job site. This kit is ideal for job planners to specify into a work project because of the easy nature of planning the job requirements against the number of connectors each kit will build. Additionally, this kit comes with the 70-90 durometer resilient pad required to achieve the proper SM endface geometry.
