

Expanded Beam

Fiber Optic solutions for Harsh Environments
Military Ground Systems,
Industrial Heavy Duty Environments

About Amphenol

Amphenol was founded in 1932. The company is one of the largest manufacturers of interconnect products in the world. The company designs, manufactures and markets electrical, electronic and fiber optic connectors, interconnect systems and coaxial and flat-ribbon cable.

Amphenol Socapex designs, manufactures and provides electrical and optical connectors and interconnection systems, ideally suited to harsh environment needs.

Our key markets are focused on mil-aero and industrial applications such as : C4ISR, commercial and military airframe, marine, ground vehicles, weapons and munitions, space and homeland security, machine tool, oil & gas, mining, railway, entertainment, and medical equipment. Amphenol-Socapex is aware of environmental issues. Indeed, most of our solutions are compliant with the European ROHS directive regarding electrical and electronic.

Amphenol Socapex devotes an important part of its budget to Research & Development, and owns all the resources needed to develop custom design products to match customer demands.

Amphenol-Socapex is recognized as a specialist of MIL-DTL-38999 derived products, high density PCB connectors, field bus and rugged Ethernet solutions, and harsh environment optical connectors.

Amphenol Fiber Optic Capabilities

For over 20 years, Amphenol Socapex has developed a strong expertise as a designer, integrator, manufacturer and solutions provider in the field of High performance Fiber Optic Interconnection.

Amphenol Fiber Optic Interconnection Solutions are tailor made to suit the needs of very demanding customers, manufacturing mission critical or safety related equipments.

This leads us to a long term commitment and partnership with our customers and to provide maintenance, repair, training, technical support, on demand.

Our Fiber Optic Solutions are based on High performance optical termini, innovative design, and high quality, well proven connector technology.

Rigorous internal quality assurance systems exceed the ISO 9001 requirements and ensure consistent quality products regardless of manufacturing location.

Amphenol Socapex Quality & Environmental Certification

Quality certification :

ISO 9001 : 2000

Thyez (France) and Pune (India)

Aeronautical market quality certification :

EN9100 : 2003

Thyez (France) and Pune (India)

Military market quality certification

(NATO) :

AQAP 2110

TECHNOLOGY

CTOS

CTOS: Small Optical Field Connector

CTOL: Large Optical Field Connector

CTOS

CTOL

CTOS and CTOL series are robust optical connectors for rapid deployment of high-speed transmission links under harsh environments. The hermaphroditic mating makes it possible to "daisy chain" cable assemblies without using any interconnect adapters. The specific lens design guarantees a large beam diameter and a low loss connection, less sensitive to dirt and dust. A specific front design and ergonomic keys ensure blind mating. The flat protective window mounted on shock absorbers provides an easy to clean surface for improved performances and protection. CTOS and CTOL harnesses are easily and cost effective field maintainable with the FTOS splice kit.

Amphenol unique CTOS and CTOL design have already gained worldwide acceptance in the ground military using. CTOS has been qualified by NATO according to STANAG 4290 requirements. These products are also widely used in geophysical, civil safety, railway, broadcast and industrial markets.

In the CTOS, 1, 2 or 4 channels are inserted in a small size design (o.d. 38mm). CTOL is a CTOS larger version up to 8 channels (o.d. 52mm). CTOL is intermateable with CTO, the first expanded beam connectors version.

- Hermaphroditic interface with rapid ramp coupling
- Design for gloved handling and blind mating in difficult conditions
- Large expanded beam
- Anti-reflective protective window easily reached and cleaned
- The rubber ergonomic shell allows an easy handling with or without gloves and ensures a high protection against shocks
- Up to 8 channels
- Cost effective field repairs
- Multimode Wavelength 850 - 1300 nm (Z version); 1300 nm (Y version)
- Singlemode Wavelength 1300 - 1550 nm (W version)

Derived product from CTOS

CNOS : navy optical field connector

CNOS is the Pier Side version of CTOS connector. The design provides flexibility for current and future Navy communication requirements both afloat and ashore. These connectors are designed for installation into Pier Side. The hermaphroditic mating makes it possible to "daisy chain" cable assemblies without using any interconnect adapters.

The specific lens design guarantees a large beam diameter and a low loss connection, less sensitive to dirt and dust. A specific front design and ergonomic keys ensure blind mating. The flat protective window mounted on shock absorbers provides an easy to clean surface for improved performances and protection. CNOS harnesses are easily to deploy with drum dedicated for afloat and ashore applications.

CROS : railway optical car jumper

CROS is the Railway version of CTOS connector. The design provides flexibility for current and future Railway communication requirements for cars jumpers.

The hermaphroditic mating makes it possible to "daisy chain" cable assemblies without using any interconnect adapters. The specific lens design guarantees a large beam diameter and a low loss connection, less sensitive to dirt and dust. A specific front design and ergonomic keys ensure blind mating. The flat protective window mounted on shock absorbers provides an easy to clean surface for improved performances and protection.

CTOS and CTOL Expanded beam technology FEATURES:

With AMPHENOL expanded beam technology, fibers are not in physical contact. The beam is expanded through the first lens and refocused through the second lens then into the fiber. By increasing the light beam surface (680 times for multimode technology and 5000 times for singlemode technology), the connector becomes highly resistant to vibrations, shocks, small debris contamination and optical misalignment. A coated protective window makes the connectors easy to clean. It is easily field maintainable if any damage occurs.

CTOS : line drawings (dimensions in mm) CTOS 06M/CTOL 06M : plug

The CTOS or CTOL plug provides hermaphroditic optical links between two points. This plug is designed to be used in harsh environment applications.

The tensile strength between plug and cable can reach 200 daN (depending on cable performance)

CTOS	23	129	100	37,8
CTOL	27	148	119	52

CTOS 77 "jam nut" Receptacle – rear mount

The jam nut receptacle has to be mounted on the vehicle panel or on a box, it provides the link between the inside electro optic device and the outside optical link. The jam nut receptacle is mated with the first plug of the outer link patchcord. Fixed by means of an hexagonal nut with possibility to be stopped using a brake wire. Front sealing ensured by an "O" ring. Electrical contact between panel receptacle and protective cap (for EMI,CEM protection when cap is on). Protective cap is attached to the receptacle by a stainless steel rope and ring.

CTOS 77P :

Straight Backshell Receptacle for pigtail

BACKSHELL MAIN USE :

To be used inside a vehicle or on a box to connect CTOS receptacle to the electro-optic transceivers, in a protected area. This rear part provides an easy cross connect output. Each pigtail can be terminated with ST, SC, FC, duplex SC, duplex LC, MTRJ connectors. Pigtails tensile strength : 10 daN. (depending on cable performance).

CTOS 77C00 :

Straight Backshell Receptacle for TACTICAL CABLE

BACKSHELL MAIN USE :

To be used inside a vehicle or on a box to connect CTOS receptacle to the electro-optic transceivers, in a non protected area. Unsealed straight backshell to be used with 1 or 2 tactical cables (1,2 or 4 number of channels) inside a vehicle. The rear part is made of 2 half shells molded in aluminum alloy. Possibility to add a multi channel connector at the other cable end. Cable/receptacle tensile strength : 100 daN (depending on cable performance).

CTOS 77M00 :

Sealed Straight Backshell Receptacle for Tactical Cable

BACKSHELL MAIN USE :

To be used inside and outside a vehicle to connect CTOS receptacle to the electro-optic transceivers, in a non protected and humid area. Straight backshell to be used with a 1, 2, 4 fibers tactical cables inside or outside a vehicle. The rear part is made of an aluminum alloy shell with a cable retention clamp. Complete front and rear sealing. Possibility to add a multi channel connector at the other cable end. Cable/receptacle tensile strength : 100 daN (depending on cable performance).

CTOS 77C90 : 90° Backshell Receptacle for Tactical Cable

BACKSHELL MAIN USE :

To be used inside a vehicle or on a box to connect CTOS receptacle to the electro-optic transceivers, in non protected area, or when the rear space is too narrow. 90° backshell not sealed to be used with a 1, 2, 4 fiber tactical cable inside a vehicle. The rear part is made of 2 half shells molded in aluminum alloy. Backshell with reduced overall dimensions. Possibility to add a multi channel connector at the other cable end. Cable/receptacle tensile strength : 50 daN (depending on cable performance).

SERIES	L1	L2	L3	L4	L5	φD1

CTOS "JaM nut" Receptacle - Panel Cutout

CTOS JAM NUT RECEPTACLE SETTING :

- Screwing Jam Nut torque value : 40mN
- Screwing nut tip : 974-146039-90
- Panel thickness : 1.6mm to 3.5mm

* MM : Multimode ** SM : Singlemode

CTOS 00/CTOL 00 "Square Flange" Receptacle rear mount

The square flange receptacle has to be mounted on to the vehicle panel. It provides the link between the inside electro-optic device and the outside optical link. The square flange receptacle receives the first CTOS plug of the outer link patchcord. The square flange type makes it possible to have a high density of receptacles on a panel. Easy panel cut off of 5 round holes. Fixation by 4 screws. - Front sealing ensured by a flat gasket. Electrical contact between panel receptacle and protective cap (EMI,CEM protection when cap is on). Protective cap attached to the panel or to the receptacle by a stainless steel rope.

CTOS 00P/CTOL 00P

Straight Backshell Receptacle for Pigtails

BACKSHELL MAIN USE :

To be used inside a vehicle or on a box to connect CTOS receptacle to the electro-optic transceivers, in a protected area. This rear part makes possible an easy cross connect output. Straight rear part to be used with 1, 2, 4, pigtails (2.8 mm single cable or duplex cable 2 x 3 ,2x 1.6). Each pigtail can be terminated with ST, SC, FC, duplex SC and MTRJ connectors. Pigtails tensile strength : 10 daN (depending on cable performance).

CTOS Shunt caps

This device is designed to test the electronic emitter and receiver as well as the optical receptacle and the link before the optical link deployment in the field.

The loop back is done by channel pairs: channel 1 with channel 2, channel 3 with channel 4.

CTOS receptacle protective shunt cap (BPPSA/BPESA)

The receptacle protective shunt cap is used to test the emitter, the receiver and the CTOS receptacle on a vehicle before using the link.

This shunt cap introduces a large insertion loss which is optical power budget dependent and has to be defined with the customer (generally 20 dB max).

The BPESA is dedicated to test the jam nut receptacle. It is delivered with a rope and a ring to be fixed under the hexagonal nut in order to replace the receptacle protective cap (see the drawing).

The BPPSA is dedicated to test square flange receptacle. It is delivered with a panel attachment cord and can replace the receptacle protective cap.

The BPBSA itself is equipped with a protective cap.

BPESA shunt cap

CTOS BSA

The BSA is a plug shunt cap with a low insertion loss, to test the plug to plug CTOSCTOL patchcord on a reel before the optical link is deployed.

The maximum insertion loss is fixed at 5 dB.

The BSA is equipped with a protective cap.

Insertion loss			
20 : 20 db max for BPESA, BPPSA (fixed with MM fiber)			
5 : 5db max for BSA, BSAR, BSAS (MM and SM fiber)			

Nota : For CTOL shunt caps consult us.

AXOS-E

This product offers a robust and protected optical connection in a small size design (o.d. 27 mm) and allows to establish a variable length daisy chain link in no time outdoor as well as indoor.

The beam diameter makes the connection insensitive to environmental contamination, temperature variations or humidity.

The special design ensures an easy cleaning of the mechanical and optical connector parts.

Features

The Amphenol AXOS fiber optic expanded beam is a miniature hermaphroditic and a cost effective connector.

Technical description

- 1, 2 or 4 channel plugs and receptacles with protective caps (plastic)
- Hermaphroditic interface with rapid ramp coupling.
- Protective window to ensure an easy cleaning of the optical device.
- Moving coupling nut allows cleaning the front mechanical parts.
- Anticorrosion metal body with ergonomic protective rubber shell.
- Blind mateable by means of rubber shell guiding protuberances.
- Z : Insertion Loss : 0,8 dB typically; 1,5 dB max @ 1300 nm

(lasersource with single mode pigtail)

- Insertion Loss : 1,5 dB typically; 2 dB max @ 1300 nm
1,6 dB typically; 2,5 dB max @ 850 nm (DELSOURCE)

- Operational wavelength: 850 nm and 1300 nm.
- Fiber size: 50/125 and 62,5/125 μm .
- Cable type : 4 to 7 mm OD Tactical tight structure.
- Durability : 2500 mating cycles.
- Operating Temperature : -40°C, +85°C.
- Termination and Maintenance tool kits available.
- Drums and accessories available.

Applications

- Army, Navy and Airforce optical networks.
- Broadcasting.
- Federal emergency.
- Mining, geophysics.
- Temporary optical links.
- Industrial moving links.

TACBEAM

Amphenol introduces the TACBeam Series into the Harsh Environment product portfolio. This legacy hermaphroditic fiber optic lens connector facilitates the inter-connection of multiple identical fiber optic cable assemblies known as daisy chaining, thus eliminating the need for polarising the assemblies and the use of in-line adapters. Lens technology is less vulnerable to mud, dirt and other contaminants than the traditional physical contact technology. This allows rapid and reliable deployment of assemblies in extreme environments. The Connector is available in 1 to 4 way configurations for multimode fibers at both 850 and 1300nm applications and is inter-mateable/interchangeable with other manufacturers equivalent products.

The standard connector components are aluminium with a long life Hard Black anodise finish with the coupling ring featuring a protective "rubber" overmould. The connector has been designed for both factory and field termination directly onto standard tactical fiber optic cable without specialist lens termination tooling. The connector construction allows for both first line field repairs and return to base overhauls of both the connector and the Lens assembly.

Features

- Proven Expanded Beam Technology
- M83526/20 & 21 Compliant
- IL Typ. 0.7db Max 2.5dB MM/SM
- Field cleanable and repairable
- Waterproof

Applications

- Military
- Outside broadcast
- Industrial/Geophysical

Materials

- Aluminum, Olive Drab or Black
- Brass
- Marine Bronze
- Stainless Steel, 303 or 316

Eurocom II

Amphenol provides cable assembly for EUROCOM II. The connector complies with the EUROCOM II Basic Parameters D/1 IB5, connector Type 2, and with the Specification TL 6020-0001 of the German Office of Military Engineering and Purchasing.

The hermaphrodite expanded beam connector is suitable for mobile applications under rough environmental conditions. Typically, the connector can be used at both cable ends. This special type "Line Connector" is mainly used for both connecting mobile cables one with another, and for connecting mobile cables to flange connectors at fix or mobile stations, to be locked or unlocked by a simple twist action.

Applications

- Military

Tactical cables with aramid yarn reinforcing protection

Technical information given by the supplier

FTOS : Flexible Tactical Optical Splice

This product allows you to easily repair tactical cables on the field with no epoxy handling. The special splice shell restores all the functions of the cable like tensile strength and flexibility crush resistance. The repaired cable can be unrolled and rolled on a reel as well as before repair. The FTOS reconstitutes the optical channels with low insertion loss.

Features

The Amphenol FTOS is a flexible field termination butt coupled fiber optical splice for tactical optical cables. It can be used for quick and durable indoor and external cable repairs. After the repair the cable can be rolled back on the reel.

FTOS is used to maintain CTOS connectors by splicing CTOS pigtails on the tactical cable of the harness.

Applications

- Tactical cable repair
- CTOS harness maintenance for Army, Navy and Airforce optical.
- Small size (o.d. 25 mm, length 400 mm) butt coupled splice
- 2 and 4 channel splice
- Flexibility : minimum bend radius : 120 mm
- Tensile strength between splice and cable : 150 daN
- Water resistant
- Operating Temperature : - 40°C; + 85°C

Performances

- Multimode typical insertion loss : 0,5 dB @ 850 nm and 1300 nm singlemode typical insertion loss: 0,5 dB, return loss : - 30 dB @ 1300 nm
- FTOS tool and consumable kits available

FTOS: dimensions

SERIES	L1	Ø D1	Ø D2

How to order FTOS piece part

HOW TO ORDER	FTOS FTOS	MM SM	2V 4V	55 60	Q05 Q05	BP BP
Series : FTOS						
Shell type :						
MM : multimode (50/125 or 62,5/125)						
SM : singlemode (9/125)						
Number of Channels :						
2V : 2 channels						
4V : 4 channels						
Cable outer diameter :						
55 : for 5,5 mm O.D.						
60 : for 6 mm O.D.						
Q05 : Number of splices per pieces part kit						
BP : Bulk pack (packaging)						

RES-GMC with Expanded Beam technology Military Ethernet Media Converter

For Harsh Environment - Fully MIL-STD compliant

Amphenol's RES-GMC is a MIL-STD rugged, unmanaged-military-grade security gateway, offering up to 2 Gigabit security gateways per device for unidirectional and data diodes solution for total isolation between two network with different security classification. The unit supports PoE on 2 ports (IEEE802.3af and IEEE802.3at).

Developed for military and harsh environment applications, the RES-GMC features mechanical packaging enhancements designed for MIL-STD-810F airborne and ground environmental compliance and high reliability.

The unit has been especially hardened to improve ingress, impact, and shock/vibration protection, as well as eliminate all moving parts through passive cooling, and interface through sealed MIL-D-38999 circular connectors.

Leveraging best-in-class switching technology, the RES-GMC series serves as a robust solution to extend your Tactical Gigabit Ethernet network connectivity of up to 120Km over fiber. Compact in size, the RES-GMC is particularly useful for remote and space-constrained locations either on ground vehicle environments or airborne.

Military applications

- Data acquisition & transmission
- Battlefield communication C4ISR
- Rugged Networks
- Combat vehicles
- Avionic & shipboard systems

Key features

■ Ethernet ports

- 10/100/1000 Base TX to 100/1000 Base FX-(MM/SM) Media converter (WDM - Optional)
- Up to 2 x 10/100/1000Base-TX and up to 2 x 100/1000 Base FX

■ Networking

- Full wire-speed forwarding rate
- Option for Up to 2 ports PoE - IEEE802.3af, IEEE802.3at
- Store-and-forward or Pass through mechanism
- Auto MDI-II, MDI-X, FDX, HDX, Flow control
- Auto-negotiation and fixed settings via DIP switch
- Jumbo frame support
- Link loss forwarding mechanism

■ Connectors

- MIL-D-38999 (Power & Ethernet signals)
- Power connector type: D38999/24WA98PA
- LAN connector type: RJ45
- Fiber connector type: CTOS 77 PC or TAC BEAM EB 4H 8000
- Protective cap over each connector

■ Chassis

- Low profile rugged aluminium extrusion
- Conductively cooled w/custom internal heat-sinks
- Ingress protection against sand, dust and moisture
- Anodize coating, MIL-A-8625, Type II, Class 2

■ Standards

- MIL-STD-1275, MIL-STD-704A, MIL-STD-461E,
- MIL-STD-810F GM, IP67/68

Product specifications

■ Performance

- 26.8 Mpps wire speed forwarding rate
- 2 Gbps maximum forwarding bandwidth
- 4K MAC address
- 2 LED indication (Speed, Link/Activity) per port
- Wire-speed reception and transmission

■ Standards compliance

- IEEE 802.3, 10 Mbps 10BASE-T (Ethernet)
- IEEE 802.3u, 100 BASE-TX 100 Mbps (Fast Ethernet)
- IEEE 802.3ab, 1000Base-TX
- IEEE 802.3z, 1000Base-FX Gigabit
- IEEE 802.3x Flow control

■ Power

- MIL-STD-1275B & MIL-STD-704A Surge and Spike protection
- Voltage input: 24Vdc nominal (18-36V)
- Power consumption: 2.8W typical
- Chassis grounding

■ Electromagnetic

- MIL-STD-461E Electromagnetic compatibility
- CE-102, CS-114, CS-115, CS-116, RE-102, RS-103

■ Environmental : shock/vibration/humidity

- MIL-STD-810F, 501.4I, 501.4II, 502.4I, 502.4II, 507.4, 500.4II, 514, 516I, 516VI, 514.5, 512.4
- IP67/68

■ Physical

- Dimensions: 169mm (L) x 149 (W) x 65(H), including connectors & hardware
- Weight: 1.260 kg

■ Installation

- Set of Four 4x4.5 mounting holes on bottom for mounting to any flat surface.
- Carrying handles - Optional

■ Cooling

- No moving parts. Passive cooling

■ Operating temp

- -35°C to +75°C (-31°F to +167°F) / -35°C Cold start-up

■ Storage temp

- -45°C to +85°C (-49°F to +185°F)

RES-GMC-1M-FORC

Military Ethernet Media Converter with Remote Control

For Fiber Extension of Existing Systems on the Field

Amphenol's RES-GMC-1M-FORC is a MIL-STD rugged, unmanaged-military-grade Media converter, offering one Gigabit copper ports 10/100/1000Base-TX and one 100/1000Base-SX fiber ports.

Combining the RES-GMC-1M-FORC with a fiber drum, your network will be extended on the field.

- Simply add 2 media converters unit 1 and unit 2 + a fiber drum
- Use our special feature: unit 2 is remote controlled by unit 1

Due to extreme low consumption of unit 2 in STANDBY mode, your battery on the field will operate longer.

Developed for military and harsh environment applications, the RES-GMC-1M-FORC features mechanical packaging enhancements designed for MIL-STD-810F airborne and ground environmental compliance and high reliability.

The unit has been especially hardened to improve ingress, impact, and shock/vibration protection, as well as eliminate all moving parts through passive cooling, and interface through sealed MIL-D-38999 circular connectors.

Leveraging best-in-class technology, the RES-GMC-1M-FORC series serves as a robust solution to extend your Tactical Gigabit Ethernet network connectivity over fiber.

Military applications

- Data acquisition & transmission
- Battlefield communication C4ISR
- Rugged Networks
- Combat vehicles

Where your system can be extended through network.

Key features

- **Ethernet ports**
 - 10/100/1000 Base TX to 100/1000 Base SX-(MM) Media converter
- **Networking**
 - Full wire-speed forwarding rate
 - Store-and-forward or Pass through mechanism
 - Auto MDI-II, MDI-X, FDX, HDX, Flow control
 - Auto-negotiation and fixed settings via DIP switch
 - Jumbo frame support
 - Link loss forwarding mechanism
- **Connectors**
 - MIL-D-38999 (Power & Ethernet signals)
 - Fiber connector type: CTOS 77 PC (2 fibers for Ethernet, 1 fiber for remote control)
 - Protective caps over each connector
- **Chassis**
 - Low profile rugged aluminium extrusion
 - Conductively cooled w/custom internal heat-sinks
 - Ingress protection against sand, dust and moisture
 - Anodize coating, MIL-A-8625, Type II, Class 2
 - Color: sand mate
- **Standards**
 - MIL-STD-1275, MIL-STD-704A, MIL-STD-461E,
 - MIL-STD-810F GM, IP67/68

Amphenol

ABOUT AMPHENOL

Founded in 1932, **Amphenol** is one of the largest manufacturers of interconnect products in the world. The company designs, manufactures, and markets electrical, electronic, and fiber optic connectors, interconnect systems, and coaxial and specialty cables.

Amphenol has a diversified presence as a leader in high growth areas of the interconnect industry and provides solutions for customers in the automotive, broadband, industrial, information technology and data communications, military and aerospace, mobile devices, and mobile networks markets.

More info on www.amphenol.com

Amphenol Military & Aerospace Operations (AMAO) has the largest and broadest selection of interconnect products in the military and aerospace markets.
