Transform your LC patch-cord into an environmental connector

The patented RJStop® system allows use of a standard LC patch-cord in a metallic plug, which will protect it from shock, dust and fluids. There is no need for field termination. This metallic plug connects to a receptacle, using a Tri Start Thread coupling mechanism (MIL-DTL-38999 Series III type) with anti-decoupling device for high vibrations.

Features:

- Sealed against fluids and dust
- Shock and Vibration Proof
- Number of Channels: 2
- Typical Insertion Loss: 0.5dB in SM & MM
- Durability: 500 mating cycles*
- No cabling operation in field and no tools required for installation
 - (Except 1.6mm and 2mm zipcord cable)

Applications:

- Railways
- Base Station
- Military Communication
- Naval Systems

Benefits:

- Solid reliable connectivity through a wide range of harsh environmental conditions
- Compatible with all qualified MILDTL-38999, Series III connectors
- Fast termination and polish time
- Reliable, repeatable and durable connections
- Easy to clean
