MIL-PRF-28876F OR MIL-PRF-28876 REV F

Your eyes do not deceive you. Olive Drab CAD plating WAS the spec for Rev E and previous issues. There will be NO MORE GREEN plating going forward.

*****Olive Drab plating still available in a COTS version*****

Here are a few key things to know:

- Effective March 1, 2021
- The spec revisions & CAD plating replacement originated in the Navy. DLA is administering the documentation (specs), qualification testing, and assures the product meets military requirements.
- MIL-PRF-28876F or MIL-PRF-28876 REV F
- The black hard anodize (BHA) PTFE is per MIL-A-8625, with supplemental impregnated, polytetrafluoroethylene (PTFE).

Advantages of the BHA plating:

- Very hard, nearly chemically inert, impervious to many corrosive compounds

Please see the QR code for more information. If you have any questions, please contact your AFSI rep before returning to ensure effective lead times and returns.
